DEUTZ-FAHR

GRAMMER MAXIMO® BASIC MECHANICAL SUSPENSION SEAT

DF-0.900.0842.9/20

In order for a seat with mechanical suspension to be truly comfortable, it must be precisely adjusted to the user's weight. In the Maximo® Basic, this is accomplished with an easy-to-use lever. Ideal for drivers of standard tractors, this seat model comes with suspension travel of 100 mm, a fore/aft isolator, and three-position height adjustment to ensure a comfortable ride.

Was ~~\$1699.95~~ **\$1449.95** +GST

GRAMMER MAXIMO® COMFORT AIR SUSPENSION SEAT

DF-0.900.0842.8/20

An integrated 12-volt air compressor makes it extremely easy to adjust the height of the Maximo® Comfort by raising or lowering a lever. Extra-wide, voluminous cushions add to the feeling of comfort while a lumbar support greatly reduces the risk of damage to spinal discs.

PLOUGH

POINT & SHARE

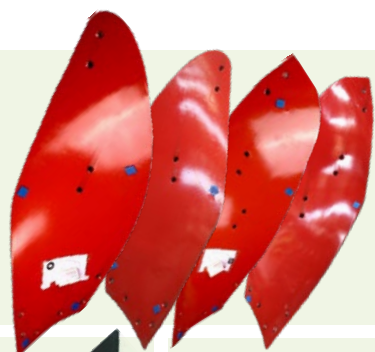

All our points and shares are specially heat treated using Kverneland's unique Zone Hardening method. Improving the quality of the steel and protecting the area around bolt holes are key factors to achieving top performance and long life time.

INFRARED CAMERA HEAT TREATMENT

Area around bolt holes flexible to avoid breakages.
Extremely hard wearing zones.

SUPER C TINES

The Super-C Tine is made from 10mm Shot-blasted Coil spring steel and has two equal length legs to evenly spread the load. Being 20% greater in diameter than conventional designs - results in one of the most durable and flexible tines on the market.

RAKES

DUO TINES

The special Kverneland Duo Tines, with their characteristic two-row raking, accurately moves the crop into the swath. The narrow distance between each tine leg ensures a cleaner sweep and reduces crop wastage.

Ian Batchelor sees the light

Ian and Judith Batchelor run a mixed sheep, beef and cropping operation based at Saltwater Creek in North Canterbury. A longtime Power Farming Canterbury customer Ian took an interest in the KRAMP lighting equipment when he visited the Power Farming site at a recent South Island agricultural machinery Field Days.

Initially Ian converted the top 4 worklights on his Massey Ferguson 6465 to KRAMP LED lights. The difference was "simply unbelievable" he said. Subsequently not only the remainder of the Masseys lights were converted to KRAMP LEDs but also all the lights on his New Holland 7520 and Claas MEGA 204 combine.

The ease of conversion, reduction in eye strain, increase

in productivity and value for money were the key reasons for changing.

He can't recommend KRAMP LEDs highly enough.
